

## Important Information about USA Care's Part D Prescription Drug Coverage

USA Care's prescription drug coverage for Eastman Kodak retirees is a Medicare-approved Part D plan with the following benefits:

- 3-tier plan that has no coverage gap or donut hole
  - **\$10 copayment for Tier 1** (generic) drugs;
  - **\$30 copayment for Tier 2** (brand name) drugs;
  - **\$50 copayment for Tier 3** (Specialty) drugs.
- Open formulary that covers all Medicare Part D-approved drugs.
- Coverage for Benzodiazepines, Barbiturates, weight loss/gain medications & erectile dysfunction medications (all typically excluded by Medicare Part D).

### Coverage Restrictions

- **\* Prior Authorization:** USA Care requires prior authorization for certain drugs. This means approval is required from Preferred Care before writing the prescription. If approval is not obtained, USA Care may not cover the drug.
- **\* Quantity Limits:** For certain drugs, USA Care limits the amount of the drug that will be covered. For example, USA Care provides 30 capsules per retail and 90 capsules per mail order for a prescription for NEXIUM.
- **\* Step Therapy:** In some cases, USA Care requires that a certain drug be tried to treat a medical condition before we will cover another drug for that condition. For example, if Drug A and Drug B both treat a medical condition, USA Care may not cover Drug B unless Drug A is tried first. If Drug A is not effective or causes an adverse reaction, USA Care will then cover Drug B.

If you have any questions about USA Care's Part D formulary or prescription drug coverage restrictions, please call Provider Service at (800) 999-3920. They are available to serve you Monday-Friday from 7:00 a.m. to 8:00 p.m. Eastern Time. You may view the USA Care Part D formulary by visiting our Web site at [www.preferredcare.org/usacare.html](http://www.preferredcare.org/usacare.html).

*\*It will be necessary for Eastman Kodak members to obtain a new approval for prior authorization or quantity limits exception from Preferred Care even if they had an active approval under their prior prescription drug coverage.*
